Slides | Demo | Repository

Projects

These are some side projects I have worked, both by me or as contributions.

Tii
Small assertion library written in JavaScript ES2015.

ng-giphy *contributed*

Module to leverage the giphy API to help display gifs in Angular projects.

[Clash of Clans Army Calculator](#)

Simple calculator for armies costs, training times and amounts, build with AngularJS. The focus of the project was to learn new things. Currently I am on the *delayed* process of [refactoring it with ES2015](#).

[Patriarchs timeline](#)

Simple app I made to learn the basic principles of React + Flux architecture. And also to test Webpack and Babel workflow.

[Express & mysql API](#)

This is a dead simple example of a API made with Express & mysql.

[social](#)

Twitter clone I made while learning Angular, to chat with my girlfriend.

Skills
